

INSTRUCTIONS

INSTALLATION:

1. Clean the entire area around the DEF tank cap including the neck and top of tank. This is only required on the initial installation.
2. Slip a new DEFBooty over the top of the DEF cap.
3. Stretch the secondary elastic band over the DEFBooty to secure it around the base of the DEF cap.
4. Fan out the DEFBooty apron to protect the surrounding area.

REMOVAL:

1. From any part of the DEFBooty apron, pull the DEFBooty off the top of the DEF cap. You do not have to remove the secondary elastic before doing this.
2. The underside and surrounding area will be clean.
3. Fill the DEF tank with new DEF fluid.
4. Replace the DEF cap and install a new, clean DEFBooty.
